Marcus Ienaro is Herrick's Chief Information Officer. He is responsible for all aspects of the firm's technology including strategy, support, operational services and managing the technology team. Marcus assesses the needs of our firm and clients and develops innovative solutions to provide the best service possible.

Prior to joining Herrick in 2011, Marcus was the Manager of Knowledge Systems at White & Case, focusing on enterprise search initiatives, knowledge sharing and collaboration systems and processes. Before that, he was the Manager of the Applications and Development group at Kasowitz Benson Torres & Friedman, after spending five years as their systems engineer.
